

2023 Energy Farm Renewable Energy Open House

When: Friday, April 21st, 3 - 5 pm

Where: The Energy Farm

4110 S. Race St. Urbana, IL

Take a tour of the Energy Farm and learn about
Biomass Heating, Geothermal, Solar/Sustainable
Construction, and Agrivoltaics

Station 1: Biomass Heating

Learn about how we convert the research biofuels we grow on site to heat our tropical greenhouse in a carbon friendly manner.

Station 2: Geothermal Research

Visit geothermal energy installations, including an experimental “Battery” for heating and cooling which could simplify and reduce costs of installation for homeowners.

Station 3: Gable Home

Tour a net-zero solar house built by students that demonstrates sustainable construction and is powered by solar and geothermal

Station 4: Agrivoltaics

Learn about one of the most attractive technology these days – agrivoltaics. It's a way of farming that combines solar panels and crops in an efficient and sustainable manner.
